

# Embedded C developer

## Who are we?

Micrel Medical Devices SA is a dynamic medical technology company, founded in 1980, with global commercial presence, which is designing, manufacturing and marketing smart drug delivery systems. The company offers a full range of ambulatory infusion pumps and related disposables for a broad array of hospital and home-based patient treatments, such as Chemotherapy, Clinical Nutrition, Pain Management, Immunotherapy, Parkinson's etc.

## Innovation

At Micrel, innovation is a way of life, at all levels of the organization. It is a continuous process that results to breakthrough products and services, targeted to assist patients, clinicians and healthcare service providers around the globe.

## What are we looking for?

A passionate Software Developer to participate in the development of state-of-the-art drug delivery devices, in areas including:

- ✓ Embedded Software Development in C
- ✓ Desktop tools development in C++, code documentation and reviews, unit and integration testing

## You are in the right place...

- ✓ If you have strong interest in developing products that contribute to safer and more effective medical practice globally, this is the right opportunity to apply your deep knowledge of microprocessor systems architecture, along with your passion in C & C++ programming languages.
- ✓ If you have experience in firmware development for microcontrollers and development using Qt framework (C++), you will have the chance to excel your skills in challenging projects.

Send us your CV today!
